

Movable Type [mt-check.cgi]

SYSTEM INFORMATION:

Current working directory: C:/hshome/cdeppen/cory.deppen.us

Operating system: MSWin32

Perl version: 5.8.1

(Probably) Running under cgiwrap or suexec

CHECKING FOR REQUIRED MODULES:

HTML::Template (version >= 2)...

Your server has HTML::Template installed (version 2.4).

Image::Size...

Your server has Image::Size installed (version 2.93).

File::Spec (version >= 0.8)...

Your server has File::Spec installed (version 0.82).

CGI::Cookie...

Your server has CGI::Cookie installed (version 1.20).

CHECKING FOR DATA STORAGE MODULES:

The following modules are used by the different data storage options in Movable Type. In order run the system, your server needs to have at least one of these modules installed.

DB\_File...

Your server does not have DB\_File installed. DB\_File is required if you want to use the Berkeley DB/DB\_File backend. Please consult the installation instructions for help in installing DB\_File.

DBD::mysql...

Your server does not have DBD::mysql installed. DBI and DBD::mysql are required if you want to use the MySQL database backend. Please consult the installation instructions for help in installing DBD::mysql.

DBD::Pg...

Your server does not have DBD::Pg installed. DBI and DBD::Pg are required if you want to use the PostgreSQL database backend. Please consult the installation instructions for help in installing DBD::Pg.

DBD::SQLite...

Your server does not have DBD::SQLite installed. DBI and DBD::SQLite are required if you want to use the SQLite database backend. Please consult the installation instructions for help in installing DBD::SQLite.

CHECKING FOR OPTIONAL MODULES:

The following modules are optional; if your server does not have these modules installed, you only need to install them if you require the functionality that the module provides.

LWP::UserAgent...

Your server has LWP::UserAgent installed (version 2.001).

SOAP::Lite (version >= 0.5)...

Your server has SOAP::Lite installed (version 0.52).

File::Temp...

Your server has File::Temp installed (version 0.12).

Image::Magick...

Your server does not have Image::Magick installed.

Image::Magick is optional; it is needed if you would like to be able to create thumbnails of uploaded images. Please consult the installation instructions for help in installing Image::Magick.
